How information and communication technologies are used to assist learning

Students live in a rapidly changing technological world. Information and communication technology (ICT), including hardware and personal digital devices, software, and systems that manage, store, process, create, produce and communicate information, has become an important part of everyday life. The integration of ICT capabilities in teaching, learning and assessment can lead to enhanced outcomes for students, and:

- support the interactive process of teaching, learning and assessment
- develop the knowledge, skills, understanding, attitudes and behaviours to assist students to live and work successfully in the 21st century

Social climate

Overview

At CTK we provide a positive, safe learning environment within which we assist the growth and development of each child. This environment is achieved: 1. By being available when a child needs help, care or attention 2. By encouraging children and reinforcing positive behaviour and success 3. By ensuring that classroom and lunch-time activities are safe and adequately supervised 4. By creating a stimulating environment for children that provides opportunities for challenging exploration, skill development, discovery and experimentation and 5. By having high expectations of all children. Bullying is dealt with immediately and firmly at CTK because it is unacceptable behaviour that is incongruent with the values of the school. Where an incident occurs it is used as a learning opportunity for all involved.
