## Purpose

The purpose of this report is to inform the school principal and school community of the destinations of students from Trinity College who completed Year 12 in 2016. This is one indicator of the outcomes of schooling.

A school may choose to use this information to:

- Review its senior schooling programs and services, e.g. subject offerings, career advice, links with employers and/or tertiary institutions
- Contribute to its reporting to parents, e.g. through its newsletter, annual reporting documents, website.

This report has been provided to the school and its school system, where this applies. The school may publish this report, if it wishes.

## Source of information

This report is based on the results of the annual *Next Step* survey for Trinity College. The *Next Step* survey, undertaken by the Queensland Government, targets all students who completed Year 12 and gained a Senior Statement in 2016, whether they attended a state, Catholic or independent school, or a TAFE secondary college. The Queensland Government Statistician's Office conducted the survey between March and June 2017, approximately six months after the young people left school. Responses were collected via computer-assisted telephone interviewing and an online survey.

The survey results were compiled and reported on by the *Next Step* team, Department of Education and Training.

Care should be taken in publicly using figures of less than three responses or percentages based on less than three responses.

## Privacy statement

To protect the privacy of individuals participating in the survey, this report contains summarised information only.

## Further information and feedback

Statewide and regional reports from the *Next Step* survey are available on the *Next Step* website at [www.education.qld.gov.au/nextstep](http://www.education.qld.gov.au/nextstep)

## Summary of findings

In 2017, 69.6% of young people who completed Year 12 at Trinity College in 2016 continued in some recognised form of education and training in the year after they left school.

The most common study destination was Bachelor Degree (40.5%). The combined VET study destinations accounted for 29.1% of respondents, including 12.8% in campus-based VET programs, with 10.8% of Year 12 completers entering programs at Certificate IV level or higher.

16.2% commenced employment-based training, either as an apprentice (11.5%) or trainee (4.7%).

In addition to the above study destinations, a further 8.8% of respondents from this school deferred a tertiary offer in 2017 (deferrers are included in their current destination).

30.4% did not enter post-school education or training, and were either employed (23.0%), seeking work (6.8%) or not in the labour force, education or training (0.7%).

There are a range of differences between and within school, regional and statewide destinations. Care should be taken when interpreting comparative data as the findings may relate to groups of different sizes.

## Response rate for Trinity College

**Table 1: Survey response rate, Trinity College 2017**

Number of respondents	Number of students who completed Year 12	Response rate (%)
148	186	79.6

Table 1 reports the response rate for Trinity College. It expresses the number of respondents from this school, as a percentage of all Year 12 completers who attended Trinity College in 2016.

It has not been possible to ascertain how representative these responses are of all Year 12 completers from Trinity College.

Please note that some survey participants did not provide information for particular survey questions. As a result, the number of responses shown in Table 3 onwards may not reflect the totals reported for the main destinations appearing in Table 2.

## Main destination

The pathways of Year 12 completers were categorised into 10 main destinations. Year 12 completers who were both studying and working were reported as studying for their main destination. Please refer to Appendix 1 for more details about each main destination.

Figure 3 compares the main destinations of Year 12 completers from Trinity College with those of Logan - Beaudesert and all schools statewide. Differences may reflect diversity in the types of students attending different schools, regional variation in labour markets and access to university and VET providers. Regional areas are based on the *Australian Statistical Geography Standard*; the boundaries for these areas are shown in Appendix 4.
